The Navigator Object

Navigator Object

The navigator object contains information about the browser.

Note: There is no public standard that applies to the navigator object, but all major browsers support it.

Navigator Object Properties

Property	Description
appCodeName (prop_nav_appcodename.asp)	Returns the code name of the browser
appName (prop_nav_appname.asp)	Returns the name of the browser
appVersion (prop_nav_appversion.asp)	Returns the version information of the browser
cookieEnabled (prop_nav_cookieenabled.asp)	Determines whether cookies are enabled in the browser
geolocation (prop_nav_geolocation.asp)	Returns a Geolocation object that can be used to locate the user's position
language (prop_nav_language.asp)	Returns the language of the browser
onLine (prop_nav_online.asp)	Determines whether the browser is online
platform (prop_nav_platform.asp)	Returns for which platform the browser is compiled
product (prop_nav_product.asp)	Returns the engine name of the browser

userAgent (prop_nav_useragent.asp)	Returns the user-agent header sent by the browser to the server

Navigator Object Methods

Method	Description
javaEnabled() (met_nav_javaenabled.asp)	Specifies whether or not the browser has Java enabled
taintEnabled() (met_nav_taintenabled.asp)	Removed in JavaScript version 1.2. Specifies whether the browser has data tainting enabled
